As a dedicated and ambitious computer science engineering student, possessing expertise in programming languages such as C, C++, Python, and JavaScript. Also experienced in web development, SQL, and SAP technologies, Demonstrated hands-on experience in creating innovative projects like CMFlex, CMTube, and CMMart with a goal of delivering impactful solutions within the tech industry. Focused on designing futuristic and user-centric applications that offer seamless functionality and attractive designs. Passionate about continuous learning, debugging challenges, and exploring new technologies to constantly enhance skills. Values instilled by hardworking parents serve as constant motivation to pursue excellence and contribute to meaningful innovations in the IT domain.

Work History

Entry-Level Web Developer
- **Entry-Level Web Developer**
- **Aspiring Full-Stack Developer**
- **Junior Web Developer**
- **Entry-Level Front-End Developer**

Education

2026-01 **B-Tech: CSE (SAP Specialization)**
Parul University - Vadodara, Gujarat
- Relevant Coursework: Data Structures, Web Development, SAP ABAP
- GPA: 7.7

Certifications

Introduction to Generator AI Studio

Full Stack Web Development

JavaScript for Beginners

Python developer

Projects

1. CMFlex (Netflix Clone) 2. CheriVibes (Music Listening Platform) 3. CMMart (E-Commerce Website)
Here's a detailed description of your three projects—**CMFlex**, **CheriVibes**, and **CMMart**—that highlight your creativity and technical skills. These projects are designed to impress recruiters and showcase your ability to build futuristic, functional websites.
Description:
CMFlex is a streaming platform clone inspired by Netflix, offering a premium, futuristic design and seamless user experience. The website includes features like a dynamic hero section showcasing trending movies, genre-based categorization (e.g., Action, Romance, Thriller), and a responsive layout. CMFlex demonstrates your front-end development skills with smooth animations, interactive UI components, and modern typography. Built using **HTML**, **CSS**, and **JavaScript**, it replicates the core functionality and aesthetic appeal of Netflix.
Key Features:
- Trending content and personalized recommendations.
- Categorized sections for movies and series.
- Fully responsive design for multiple devices.
Description:
CheriVibes is a simple and engaging platform designed exclusively for listening to music. It offers users an easy-to-navigate interface where they can explore and enjoy curated playlists based on their mood or occasion. With a clean and attractive design, CheriVibes is built for seamless music playback and an immersive experience. Developed using **HTML**, **CSS**, and **JavaScript**, it prioritizes simplicity and elegance, making it a go-to choice for music lovers.
Key Features:
- **Mood-Based Playlists:** Offers curated playlists to match user moods (e.g., Relaxing, Romantic, Energetic).
- **Minimal Design:** Focused on simplicity and smooth navigation.
- **Responsive Layout:** Accessible on mobile, tablet, and desktop devices.
Description:
CMMart is a futuristic e-commerce website designed for business purposes, with functionality inspired by Amazon. It features product categories, a dynamic shopping cart, and a secure checkout process. With a clean and visually appealing design, CMMart ensures easy navigation and a smooth user experience. Built using **HTML**, **CSS**, and **JavaScript**, the platform is optimized for responsiveness and scalability, making it a robust solution for real-world applications.
Key Features:
- Advanced search and filtering options.
- Product recommendations and user reviews.
- Responsive layout for desktop and mobile users.

Keyhighlights

Problem-solving, Web Development, Quick Learner, Detail-Oriented, Adaptable, To grow as a software developer and contribute to impactful tech solutions.
